

Gary E. Moore

October 2, 1951 - February 12, 2016

Gary E. Moore

Hampton – Gary E. Moore, 64, of Hampton, died February 12, 2016 at his home after a sudden illness.

He was born October 2, 1951 in Amesbury, Mass., a son of the late Fred S. and Clara (Jones) Moore.

Gary was raised in Seabrook. He was educated in Amesbury through the Seventh Day Adventist Church education curriculum and later at Greater Boston Academy a private Christian school in Stoneham, Mass.

Gary graduated from Atlantic Union College in South Lancaster, Mass., received his Bachelor's Degree from Walla Walla University, College Place, WA and his Master's Degree in Physics and Meteorology from Massachusetts Institute of Technology, Cambridge, Mass..

He was presently employed as a senior meteorologist beginning with Earth Tech that succeeded to present day Aecomm. He was dedicated and persevered at his work, helping to clean up the air we breathe. Gary was very passionate about the environment, leaving his mark through his research and tireless dedication to helping people. He recently started his own small consulting business Aerokinetics.

He leaves four sons, Corwin Moore of Newmarket, Eric, Max and Nicholas Moore all of Hampton, two grandchildren, Aiden and Damien, his brother, Robert Moore and his wife Jean, his sister, Evelyn Fowler all of Seabrook, his aunt, Sylvia Gove of Florida, and his uncle, Thomas Moore and wife Barbara of Lynn, Mass.

A celebration of Gary's life will be held at 11 A.M. Saturday, March 12, 2016 at the Remick & Gendron Funeral Home-Crematory, 811 Lafayette Road, Hampton. Relatives and

friends are respectfully invited.

“ I am sorry for your loss. I worked with Gary at AECOM in Chelmsford, MA for the past few years. He was a good person. Adrienne Kielsing

Adrienne Kielsing - March 12, 2016 at 07:52 AM

EL

“ Soon after I was hired as a consultant with Earth Tech where I worked with Gary on various air quality studies, our families became close friends. We have known Gary for over 15 years. Even when we moved back to Germany we kept in touch until his sudden passing. We all could always rely on Gary's well-intentioned and well-informed insights on all matters of life and science.

Harry and I will always miss Gary's keen discussions on all aspects of science. One of our last discussions centered on the ever increasing amount of data in the geosciences and the infrastructure and tools needed to create data legacies to be used in an efficient way. That Gary had already contributed to this area as well didn't come as a surprise.

Gary was also a poet who loved to write haikus that must, by now, fill books. Besides his love for poetry, he was always on the outlook for interesting musicians. Shortly before his passing he stirred up a discussion on whether an elaborated version of a keyboard can be used to perform classical piano pieces in the same quality as with a grand piano. Well, we couldn't conclude on this topic, anymore, and I am afraid, I would have to concede to Gary's profound multi-layered argumentation.

*Harry & I with Silas & Felix miss deeply Gary's great friendship.

“ I have known Gary for over 25 years and worked closely with him at Sigma Research Corporation (SRC). Gary was an incredible fount of knowledge on a seemingly endless variety of scientific subjects. No matter what we discussed, Gary could immediately produce a list of references and key research papers. Gary was also very talented with computers and computing. Always exploring ways to make computers and computer programs run faster, Gary helped me considerably in my own programming efforts. In fact, after I retired from SRC and moved to Maine, Gary built me an amazing dual operating system computer that I still use today. He also continued to assist in my research efforts by obtaining numerous journal articles for me during his many visits to MIT's science libraries. I also considered Gary a close personal friend, and I visited him at his home on Moore's Lane in Seabrook on a number of occasions. I am deeply saddened by his untimely passing and I will miss his friendship and support greatly.

“ The AECOM UK air quality team would like to send our deepest sympathies to Gary’s family and friends on his sudden passing. We have known Gary for the last few years as he has been working with us on one of our major projects in the Middle East. We would have weekly phone calls with him to discuss progress on the project and would gain an insight into “Gary’s world”. His enthusiasm for the project was unsurpassable as every week he would come up with new and wonderful ideas for further research. His strong work ethic and his passion for knowledge will always be an example to us. We feel lucky to have shared some steps on his path, for a time too short.
Rest in peace Gary.

“ This message is from the Australian staff from AECOM who would all like to express our condolences to Gary's family, friends and colleagues after this passing. Gary has been working with us on projects for over 5 years and we will greatly miss his keen intellect, friendly nature and willingness to solve any problem that presented itself. He was a dedicated air quality scientist who dedicated himself to solving any of the problems presenting themselves regardless of the time of day, nature of problem or personal time. Gary's council and friendship will be greatly missed by all of us in Australia. David Rollings

“ I am sadden to hear this news from Bob Pain, who was kind to inform me. It is a great lost for me and all of us,

Gary who is such a kind, sharing and warm person with so much knowledge. His caring towards his friends was lovely and he also ensured that you were not lost or alone. He would always have someone to say and can talk for hours. I met Gary through my project from Saudi Aramco (Saudi Arabian) on Petrochemical modeling and my intern spent at Earth Tech in 2003 in Boston. I a truly sadden and wish blessing to him and peace. I pray for this family. He will not be forgotten and will always remain in my heart. Nadeem Ahmedkhan

Roarke Hess - February 19, 2016 at 10:28 PM

DH

In addition to the interaction that Gary and I had working together on air quality modeling problems since he joined AECOM, I will most miss our conversations about all kinds of topics in which we shared interest. I first met Gary in the 1970's when our paths crossed at MIT's Department of Meteorology. My first impression was his enthusiasm, depth of his knowledge, inventive way of thinking and wide range of topics in which he interesting. When he recently joined us as part of the EarthTech merger, we found that we had many common interests and Gary would often use me as a sounding board for his seemingly endless supply of "aha!" ideas on how to look at issues in new ways, often well beyond my limited comprehension. He was very giving of his time and eager to chip in to help me solve dumfounding problems. Gary also entertained me when we talked about his personal travails, whether it regarding his latest motor vehicle acquired at auction, keeping up his house and helping out his boys. Most of all I thank Gary for enriching my life and leaving me with many fond memories.

To Gary's Friends and Family,

I had the pleasure of working with Gary at the start of my career in air quality consulting at SAI in 1979. He was a tremendous resource and brilliant in many things. He was also a little eccentric, but in a good way. I remember many in depth discussions on atmospheric processes and numerical methods that would go on for hours. The atmosphere at SAI in the early 1980s was electric and Gary was one of the unique individuals of that era. Times change, but Gary was always Gary. I was looking forward to seeing him in April, but unfortunately that will not occur. For all his colleagues and friends that knew him at SAI in the 1980s we are sorry that he has left and have great memories of his spirit of learning and innovation.
